

1-Objectives of the training Master Finance Enterprise

The master in Enterprise Finance aims to prepare and qualify graduates to work in financial functions (to exercise financial responsibilities) both at the institutions made by themselves, or private or public economic and administrative institution. Or in entities dealing with it financially (banks, financial institutions, financial advisory offices...) , by enrich them with theoretical foundations and applied methods (techniques) in the field of finance, specifically with regard to

Financial analysis, fundamentals of corporate finance, project feasibility study standards, specialized financing techniques, banking and insurance techniques, valuation techniques for companies and financial assets, pool accounting and international accounting standards.

In doing so, we should delve into the various constantly evolving financial knowledge, and constantly link the acquired knowledge with the practical reality of the institution and the financial market sphere.

The specialization also provides solid scientific foundations and deepening the academic background for those enrolled students who wish to continue their academic research, And continue their postgraduate studies to obtain a doctorate degree in corporate finance or finance in general.
